

Arizona Report of Public Agency Performance on Racial / Ethnic Disproportionate Representation by Disability

Indicator 10: Racial / Ethnic Disproportionality by Disability

Percent of PEAs with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.

Measurement

Arizona uses a data analysis tool provided by Westat Research Corporation to consider ethnicity by disability information to identify those education agencies in the State that have unusually high or unusually low rates of students (aged 6-21) in specific disability categories. The tool compares the ethnic and disability makeup of the State to the ethnic and disability data of each agency and provides a “weighted risk ratio” (WRR) for each agency.

Arizona uses a WRR of ≥ 3.0 for over identification and a WRR of $< .33$ for under identification in determining if a PEA has disproportionate representation within any disability. Because Indicator 10 is concerned with disproportionate representation **that is the result of inappropriate identification**, the ADE reviews the policies, procedures, and practices of the identified PEAs to determine compliance with child find and evaluation requirements.

Explanation of Indicator

The table below indicates whether or not each PEA had a WRR of ≥ 3.0 or $< .33$ for any disability within an ethnic group. If the answer to that question is “yes”, the table indicates if the State determined that the PEA had inappropriate policies, practices, or procedures in identification. If the answer to that question is “yes”, the table indicates if the noncompliance has been corrected.

The determination of inappropriate identification was made through a combination of policy and procedure reviews prior to approving IDEA funding and monitoring findings related to actual practices within the PEA. The data are reported for SY 2006-2007 (Federal Fiscal Year 2006).

State Target for SY 2006-2007: Zero PEAs with disproportionate representation that was the result of inappropriate identification.

PEA	Was disproportionate representation (DR) evident?	Were there inappropriate identification policies, procedures, or practices (PPP) in FFY 2006?	Have any inappropriate PPP been corrected?	Was the State target met?
